**SAMARA REGION**

The Samara region is a part of the Volga federal district and is located in southeast part of the European territory of Russia, in the middle the Volga region. In the North borders on the Republic of Tatarstan, in the South - on the Saratov region and the Republic of Tatarstan, in the East on the Orenburg region. The area of the Samara region - 53,6 thousand sq.m.

The region occupies a favorable economical and geographical position. The area is one of the most significant transport routes and, possessing all means of transport, has an exit not only in any part of Russia, but also to other countries.

The Samara region is included into a number of the strongest industrial regions of the country with diversified economy, high concentration of processing production and powerful scientific and innovative potential.

The basis for the development of area economy is formed by hi-tech processing productions with a high added value such as automotive industry, an aerospace production complex and productions of low-depth processing in the spheres of raw materials, chemistry, metallurgy. Introduction of innovative technologies is the most important condition of their development as well as a modernization on the basis of re-equipment and application of innovative methods in management.

Today the Samara region belongs to the regions of Russia where the complex of necessary conditions for successful modernization and creation of new innovative economy is created. Leading positions of the area in this sphere are confirmed by high ratings of independent experts:

- The 2nd position in the category "For Stimulation of Innovative Activity" in the nationwide competition of strategies and programs for social and economic development which was arranged among the federative states of Russia on a topic "Regions of Russia: from crisis to development" in 2011;

- The 6th position in a rating of innovative activity of the regions, carried out by National association of innovations and developments of information technologies and. Hence the region is included into a group of regions with high innovative activity in 2011;

- The 5th position in a rating of the Russian regions which, according to the opinion of “The Institute of innovations of infrastructure and investments and “The Public opinion Fund” belongs to group of regions "ready for innovative development" in 2010;

- The 8th position among subordinate entities of the Russian Federation and the third place among regions of the Volga federal district for its level of innovative potential according to a complex assessment of Expert RA rating agency in 2010-2011.

The Samara region is rich in raw materials: hydrocarbonic, mineral and construction, mining and chemical raw materials.

In the region there are unique natural objects. Here is the largest European river - Volga, which extent on the territory of the Samara region for 340 km. The
The Samara region is considered to be one of most economically developed regions of Russia. On the extent of a gross regional product the Samara region occupies the 10th place among all the areas of the Russian Federation. By an assessment as a whole for 2012 the gross national product was 937.6 billion rubles.

The structure of the economy of the region is rather diversified. Practically all types of economy are presented in this region. The greatest part of the gross product occupies industrial production (42.1%), then goes trade (11.5%), transport and communication (11.5%), operations with real estate (11.5%) and construction (7.1%).

The main branches of specialization are the automotive industry, the air-space industry, chemistry and petrochemistry.

The Samara Region has all the necessary qualities to establish and develop effective international relations:
- favorable transport and geographical location;
- highly developed industrial, scientific and technical potential;
- high labor potential;
- developed market infrastructure;
- stable political and social environment;
- Regional investment legislation providing benefits and guarantees for foreign investors.

The Samara Region is rich in various mineral resources. The mineral and construction raw materials of the Samara region are represented by a construction stone, brick and tile raw materials, construction sand, expanded clay, refractory clays, cement raw materials, plaster, carbonate breeds for production of construction lime, plaster and anhydrite, sand-gravel materials, sand glass.

The mining and chemical raw materials of area are represented by phosphorite, sulfur, stone salt, asphaltite and bitumen, natural bitumen, combustible slates. The mining raw materials are presented by forming sand, concrete clays, zeolite-containing solid.

The main mineral of this area is oil. There are more than 380 oil fields on the territory of the region.

In spite of the fact that the Samara region is the old extracting oil region (industrial oil production in the territory of the Samara region began in 1936), the volume of oil production has considerably grown in the last years. In 2007 - 11.3 million tons, in 2011 – already 14.23 million tons were extracted, including JSC Samaraneftegaz (JSC Rosneft subsidiary) extracted 74.5% of oil, and, respectively, 25.5% was extracted by small oil-extracting companies.

Specific weight of the Samara region in oil production across Russia amounts to...
According to the data of 2011 the Samara region occupies the 3rd position for the volume of oil extraction among the regions of the Volga federal district, after the Republic of Tatarstan and the Orenburg region.

The powerful innovative territorial aerospace cluster is created in the Samara region. This cluster unites the leading enterprises of the rocket production, engine-building and the production of the aircraft equipment. The basis of the aerospace cluster form the space-rocket mechanical enterprises, aircraft industry, the propulsion engineering and the aggregation, the research organizations.

The main feature of a cluster is that on the territory of one region all the existing types of production of the whole range of aerospace equipment are concentrated. Today the enterprises of this cluster develop and produce space aircraft, aviation and rocket engines, units and accessories for the aircraft equipment, also the maintenance and the repair of various aircrafts and power units are made.

The anchor enterprises of a cluster are the Federal State Unitary Enterprise GNP Payment Processing Centre TsSKB-Progress, JSC KUZNETSOV, JSC Aviakor-Aircraft Factory. The scientific research of the cluster is provided by the specialized design offices, the research and innovative and implementation organizations. The special place among them occupies the Samara State Aerospace University named by academician S.P.Korolev (the national research university).

On the basis of the university the supercomputer center "Sergey Korolev" is the only one in Russia, specializing in the sphere of aviarocket production, engine-building and space mechanical engineering, as well as the Volga regional center of space geoinformatics and the Center of obtaining space information works.

The kernel of the cluster of the aviation brunch is JSC Aviakor-Aircraft Plant. It is one of the largest Russian aircraft manufacturing enterprises. The plant is included into the Russian Cars holding which unites machine-building assets of the Basic Element group. The main activity of the plant is construction, repair and maintenance of the planes Tu-154M and An-140-100. The results of 2010 show that the plane An-140-100 is acknowledged by the winner of the state Russian competition "100 best goods of Russia". According to its characteristics, An-140-100 is capable to compete with foreign analogs which aren't adapted for the conditions of low temperatures and soil runways of airfields. Now there are three An-140-100 liners that are successfully operated by Yakutia airline.

The automotive industry is one of the industries of the Samara region. For the Samara region the highest concentration of the organizations of the automotive industry and the highest share of the automotive industry in VRP structure among all the subjects of the Volga federal district are typical. The automotive industry of the Samara region includes the car assembly enterprises of JSC AVTOVAZ, JSC Dzhi-Em AVTOVAZ, etc., the producers of autocomponents, and also the design, research, financial, trade, service, consulting and other organizations working all over the territory of the Samara region. The automobile cluster of the Samara region makes about 22% of VRP of the
region. Here are counted only 5% of the total number of the employed in the region. The leading enterprise of a cluster is JSC AVTOVAZ which makes today more than 1500 cars in day. Now JSC AVTOVAZ according to the development Strategy till 2020 carries out a global modernization of the proceedings, realizes the program on the improvement of the quality, actively brings to the market new models.

The petrochemical cluster is more than 1/3 of the economic capacity of the region. The cluster includes oil production and oil processing, chemical production. The large enterprises are concentrated in the Samara region. Their production occupies a significant positions in the Russian and the World markets of the hi-tech production. In this region there are higher education institutions that are considered to be the leading centers of the competences of Russia in the field of chemical technologies. The development of a petrochemical cluster of the Samara region is defined by such large enterprises of the region as: JSC Samaraneftegaz, JSC Kuibyshev Refinery, JSC Novokuibyshev Refinery, JSC Syzran Refinery, JSC Kuybyshevazot, JSC TogliattiAzot, JSC Tolyattikauchuk, JSC Promsintez and others.

In April, 2011 the integrated chemical holding "Samaranefteorgsintez" was created. The holding included all the large operating enterprises of oil and gas chemistry and organic synthesis of the Novokuybyshevsk chemical platform: JSC Samaraorgsintez, JSC Neftekhimiya and JSC Novokuibyshevsk Petrochemical Company.

In Tolyatti on the basis of the JSC Tolyattikauchuk enterprise and the service company JSC Tolyattisintez an initiative of the SIBUR holding of creation of the first specialized chemical park in the Samara region is realized. The enterprises of a petrochemical cluster of the region traditionally have a high investment activity.

JSC Kuybyshevazot in 2011 began the implementation of the project in the field of creation of the power effective production which will allow the enterprise to increase a great number of outputs of the innovative production at least by 1,3 times.

Another enterprise of a petrochemical cluster – JSC TogliattiAzot - plans to finish building the first turn of the port on Taman Peninsula this year. It will give an opportunity easily to export the enterprise production to the world market. The largest oil-extracting and oil processing on the territory of the Samara region the JSC Rosneft company plans to spend on the global reconstruction of some of the Samara oil refineries till 2015 more than 70 billion rubles. Investment programs of the enterprises of a cluster are directed on great modernization of the production as well as the application of new technologies for the increase of outputs, release of new types of goods, increase of the energy efficiency and ecological safety.
JSC Biaksplen NK is the largest Russian enterprise of the production of packing materials. Here at the beginning of 2011 the new innovative production which deals with the release of polymeric films was started. From the moment of foundation in 2011 the SamaraNefteOrgSintez holding actively updates the all the chemical productions, gets ready to start working with new powerful modern equipment: on a platform of JSC Novokuibyshevsk Petrochemical Company works on the renovation of the TsGFU-3 installation. On a platform of JSC Samaraorgsintez a lot of work is done for the production of phenol and acetone, automation of productions on the basis of microprocessor equipment proceeds.

The agro-industrial complex of the Samara region represents a diversified productive and economic system in which there are about 500 collective agricultural organizations, 2882 peasant (farmer) household, 261,3 thousand private subsidiary farms and about 1000 organizations that deal with food, processing industry and agroservice function. It takes 5 - 7% of a gross regional product and about 3% of fixed assets. In rural districts live 622,3 thousand people or 19,6% of all population of the Samara region, them 35,8 thousand people of them occupy the public sector of the agricultural production. Previous year became for the landowners of the Samara region year of overcoming of consequences of the hardest drought of 2009-2010. Serious collaboration which was carried out by the agricultural producers, the regional Government and the federal Ministry of Agriculture, allowed us not only to keep the capacity of agricultural branch, but also to achieve a very essential success in its development.

The Ministry of Economic development of the Samara region offers investors to participate in the following projects:
Construction of the complex for industrial growing and refining of champignon mushrooms on the compost of domestic production of the Samara region.
Creation of an agro-cluster “Bio-Energy”
Reconstruction of the “Timashevska Poultry Farm” LLC
Creation of the IT tech-park “Zhigulevskaya Dolina”
Design and building of the earthenware construction supplies plant with a capacity of 20-30 million brick pieces per year.
Construction of the agricultural complex including “Pohvistnevsky Sugar Factory”
Construct completion of the oil refinery
Development of the steel service center “SteelPress” LLC, and as a result an increase of heat convector “ATerm-20” production
Innovation center “Agricultural tech-park of private farming”
Application of the results of space activity to the benefit of the social and economic development of the Samara region
Organization of high-tech chemical production manufacturing
Elaboration of new oil-dissolved gas utilization technologies and manufacturing equipment on their basis
Creation of the public and energy infrastructure for building “Berezovka”
residential area
Building of the “Volgar” housing estate in the Kuibishevsky District of Samara
Industrial and logistics complex in the town of Oktyabrsk, the Samara region
More detailed information can be obtained from a website of the Ministry of
Economic development, investment and trade of the Samara Region:
http://economy.samregion.ru/activity/investicii/poddergka_investora/invest_proekt

6 causes to invest into the Samara region
1. High level of economic activity
2. Well-developed innovative and educational potential
3. Investment oriented legislation
4. Comfortable environment and advanced social infrastructure
5. Efficient strategy of attracting investments and maintenance of projects
6. Smart civil society

The Samara region leads consistent and task-oriented activity concerning the
creation of the comfortable regional investment environment.
The main principles of the investment policy of the Samara region are as follows:
• Securing with favorable informational and institutional environment for
investment attraction
• Reduction of barriers to market access
• Effective support of entrepreneurship on the legislative level
• Beneficial public-private partnership

Investment legislation
Regional investment legislation guarantees equal conditions for all investors,
facilitates elimination of administrative barriers and establishes favorable taxation
scheme and preferences
The main instrument for investment process regulation is the “Regional
Investment Act” concerning a state support of the investment activity in the
Samara region.
This document defines the main principals of the investment activity state support
in the Samara region:
• Equal status of investors
• Information accessibility which is required for carrying out investment activity
• Equation of both public and private interests
• Legitimacy, objectiveness, economic feasibility and permanence of decision
making

On the pre-investment phase investors are offered informational, methodical
and consultation assistance which includes a selection of production areas and land
properties
There is also a possibility for making investment memorandums between
The Government of the Samara region and investors who carrying out on the
territory of the region projects costing 650 million rubles and more. In accordance
with the investment memorandum the government supplies the investor with the
most favorable conditions for a project delivery period and appoints a government
trustee. The investment memorandum is made for the pay-off period which does not exceed seven years.

On the phase of a project delivery investors have an opportunity to get subsidies from the regional budget for reimbursement. The subsidies are of a compensatory nature and can be obtained only on the competitive base. The subsidies are granted only in the cases and within the limits prescribed by the Budget act of the Samara region for a corresponding financial year or a scheduling period.

Investors have an opportunity to get government guarantees for repayment of borrowings raised for investment activity. The government guarantees of the samara region are granted on the competitive base and a repayment period should not exceed seven years as well.

On the phase of the project fulfillment the government support of investors on the territory of the Samara region is performed by means of concessional taxation:

1) Property (produced or acquired within the period of project delivery) tax remission for the organizations carrying out projects at the cost of less than 100 million rubles for a two-year period, 100-500 million rubles for a four year period, more that 500 million rubles for a five year period.

2) Digression of a profit tax up to 13.5% for a project at the cost of 100 million rubles and more per day of the application to tax authorities. For the organizations-investors who carry out projects priced at 100-500 million rubles digression is granted for 4 tax periods, 500 million rubles and more – 5 tax periods. This privilege is applied to profit acquired from the goods and services disposal as the result of fulfilling investment project from the beginning of the accounting reference period determined by the data of the fiscal accounting.

It important to note that the Stavropolsky district of the Samara region is the first in Russia to establish digression of the profit tax payable to the regional budget to 0% by the end of 2018, and then its gradual rise up to 13.5% by 2025:

- 3% from 1 January 2019 to 31 December 2012
- 7% from 1 January 2021 to 31 December 2022
- 10% from 1 January 2023 to 31 December 2024
- 13.5% from 1 January 2025 and later

The Samara region is the first in Russia to create favorable conditions for investments to single-industry towns with population less than 100 thousand people (Tchapaevsk, Oktyabrsk, Pokhvistnevo). The following additional tax benefits and preferences for investors are legislatively fixed.

For the investors who carry out projects in small and average single-industry towns (in comparison with existing rules) a digression rate is lowered to 13.5% on the profit tax payable to the regional budget and a term of remission of the property tax is increased to 2 tax periods.

Another important additional supporting measure is granting subsidies from the regional budget equal to 2000 euros (in rubles at the rate of the Central Bank of Russia) to investors for each newly created workplace. This support is given under following conditions: creation of not less than 25 constant workplaces during the implementation of the investment project; the volume of capital investments
according to the project has to make not less than 30 million rubles; implementation by the investor of the form of economic activity in the sphere of "Processing production".

**The special economic zone** is situated near the city of Togliatti, in the North-Western part of the Samara region, in Stavropolsky municipal district, in closest proximity to the production site of JSC «AVTOVAZ». Geologic and geodesic survey and project activities were carried out for this land plot. Total area of the SEZ is 660 ha.

Closest residential areas are as follows:
- the city of Tolyatti is in 2-3 km eastwards;
- «Yagodnoye» village is in 3 km westwards;
- «Podstepki» village is in 4 km southwards.

**Key traffic landmarks:**
- The SEZ is in 22 km from the federal route M-5 «Ural»;
- The SEZ is in 60 km from the closest international airport «Kurumoch»;
- The SEZ is in 17 km from the Togliatti river port (cargo and passenger port in the Volga River, in the area of Kuibyshev Water Reservoir).

SEZ «Togliatti» is situated in one of the most densely populated Russian regions. The aggregate number of regular population within 500 km from the SEZ is about 20 millions. The biggest centers in the area of traffic availability are millionaire cities Samara, Kazan, Ufa.

**Special administrative regime**
According to the Federal Law on special economic zones, resident enterprises of the SEZ are guaranteed against unfavorable amendments to the Russian legislation on taxes and fees.

Special administrative regime in the SEZ extends for the land tenants, which own real estate, the right to purchase in ownership the appropriate land plots.

All types of communications required to set up production activities are made available for the residents. Free connection to all types of energy resources is ensured as well.

**One stop shop concept**
There shall be an effective system of public administration in the special economic zone: «One stop shop» scheme to ensure for the businessmen most convenient contacts with public and municipal bodies of management and control. «One stop shop» system shall allow to facilitate paperwork for the residents, reduce administrative barriers with the use of a single contact point for all types of business cooperation with the state.

Governmental structures represented in the «One stop shop» system in SEZ «Togliatti»:
- Federal Tax Service
- Ministry for Natural Resources and Ecology
- Ministry for Health Protection and Social Development of the Russian Federation
- Federal Service for State Registration, Cadastre and Cartography
* Rostekhnadzor
* Inspectorate Board of Gosstroynadzor
* Pension Fund
* Social Security Fund
* Federal Fund of Mandatory Medical Insurance
* Migration Service
* Chamber of Commerce and Industry
* Federal Customs Service

**Tax breaks**

Tax and customs benefits and preferences: immunity from property tax, transport tax and land tax for five years term of, and profit tax reduction up to 13.5%. During the first 5 years the SEZ residents are exempt of property, land and transport taxes, income tax is reduced down to 15.5%. There are additional benefits on the corporate income tax:

* Accelerated procedure for the recognition of R&D costs;
* Accelerated depreciation.

**SEZ infrastructure**

The SEZ site shall be fully equipped with all required engineering, transport and social infrastructure. The residents can take advantage of up-to-date production, warehouse and office facilities. For the investors this ensures considerable cost cuts.

Construction of the SEZ shall be financed from budgetary and non-budgetary sources. The aggregate scope of investment in the construction of intra-site infrastructure and connection of engineering communications to the SEZ territory shall be 340 mln. Euros.

* Federal budget – 180 mln. Euros (53.1%);
* Budget of Samara region – 20 mln. Euros (5.7%);
* Off-budget sources – 140 mln. Euros (41.2%).

The capacity of engineering infrastructure is rated with consideration of technological requirements of the potential residents. The SEZ residents are connected to all types of energy resources free of charge.

Everyday access to the resources of administrative and business center shall be allowed to ensure effective operation of the residents. The investors can use the «One stop shop» system, meeting rooms, exhibition hall and other facilities. For the residents and interested parties this ensures effective operation and convenient business environment in the SEZ «Togliatti».

**Free customs zone**

SEZ «Togliatti» operates as a free customs zone. Thus, the investors can avoid over payments related to import of equipment, resources and materials, or export of finished products.

Free customs zone is a customs procedure where products are located and utilized within a SEZ or its part without payment of customs fees, taxes, with out application of non-tariff measures in respect of foreign products and without application of bans or restrictions in respect of the customs union products (as defined in the Treaty between the Government of the Russian Federation, the
Government of the Belorussian Republic and the Government of the Republic of Kazakhstan of June 18, 2010 «On Free (Special) Economic Zones in the Customs Territory of the Customs Union and Customs Procedure for Free Customs Zones»).

Foreign goods imported into SEZ «Togliatti» (equipment, raw materials, components, construction materials) are placed and used without paying of customs duties and taxes, as well as with no applying non-tariff regulation. Customs Union goods are placed under the customs procedure of a free customs zone without payment of export duties, and without applying prohibitions, and restrictions.

**Hi-tech park “Zhiguli Valley”**
The project on the construction of «Zhiguli Valley» tech-park was implemented as a part of the State Program approved by the Russian Government «The establishment of hi-tech industrial parks in the Russian Federation», and pursuant to the Decree of the Samara regional Government «On approval of the regional target program with regard to the establishment of Zhiguli Valley hi-tech Technopark in the city of Togliatti, within 2010-2014». The planned investment is 4,818 billion rubles. Financing of the infrastructure construction comes from the federal and regional budgets and from extrabudgetary resources.

Project purposes:
- Creation of the material and technical base necessary for ensuring functioning and development of the organizations of the region, carrying out development and deployment in production of high technologies;
- Increase in the outputs of products, based on application of innovative technologies;
- Increase of competitiveness of the hi-tech production released by the enterprises of the Samara region;
- Creation of new workplaces and liberation of Tolyatti from single-industry dependence.

Support mechanisms for residents:
- Placement in Science and technology park on favorable terms;
- Preferential regional taxation scheme;
- Expenses sponsorship program for innovative activity: development of the business plan, patenting and certification, payment of payment of interest on loan, elaboration and prototype production, preparation for manufacturing of innovative production, etc.;
- Organization of access to laboratories of joint usage and to the center of equipment public usage;
- Assistance in financing arrange
- Search for potential clients and customers among residents and participants of science and tech-park;
- Organization of educational courses and training;
Information support and promotion of projects; 
Miscellaneous services.

A new Football stadium is going to be built in Samara not far from riverside station. Several territories were considered for construction - the area of the plant of Maslennikov, Island «Koroviy» («the island of cattle»), the village «Krasniy Pakchar» («Red Plowman»), Samara racetrack. Nevertheless, the soccer complex will be erected at the direction of the rivers Volga and Samara. According to the Government this is a good place to build. The stadium will be built in the river port, where it is shown located warehouses and barns. Lot size is 32-40 hectares, length of bank protection is 2000 – 2800 m. Sports complex can accommodate 40-45 thousand people. It is planned to build a two-tier stadium with natural grass. A stadium will be equipped with artificial heating systems and automatic irrigation.

Reconstruction of the airport «Kurumoch»

Project objectives:
Creation of a transport hub - one of the key elements of the national transport system that ensures its effective functioning and development.
Increasing the capacity of the airport complex to service domestic and international passenger flights (up to 5 million passengers per year).
Meeting the public demand for air services.
Bringing the technical equipment of the airport in accordance with applicable Russian and international standards and technical capabilities of the airfield, improving aviation security.

The project includes:
- Design and construction of a new airport terminal
- Reconstruction and modernization of engineering systems and communications
- Design and construction of a new cargo complex
- Design and construction of the mechanization center
- Design and construction of a hotel and a business complex
- Design and construction of covered multi-storey car parks
- Design and construction of aircraft maintenance center

Higher education is widely represented in Samara:

- 37 institutions of higher education;
- 51 secondary technical and secondary specialized educational institutions;
- 182 schools;
- 215 pre-school institutions;
- 140 institutions of supplementary education.

Samara State Aerospace University (SSAU)

The state educational institution of higher professional education «Samara State Aerospace University named after academician S.P. Korolyov» (SSAU) was
founded in 1942 as Kuibyshev Aviation Institute (KuAI) with the purpose of the preparation of the engineers for the aircraft industry.

Faculties of Samara State Aerospace University (SSAU) •
Faculty of Aircraft Construction
Faculty of Aircraft Engine Design
Faculty of Air Transport Engineers
Faculty of Industrial Engineering
Faculty of Radio Engineering
Faculty of Informational Science
Faculty of Economics and Management
Faculty of Correspondence Education
Faculty of Base Preparation and Fundamental Sciences •
Institute of Power Engineering and Transport •
Printing Institute •
Institute of Supplementary Professional Education •
Institute of Computer Research
Institute of Integrated Safety and Security
Humanities Institute

Address:
443086, Samara, Moskovskoye Shosse, 34
Tel.: +7 (846) 335-18-26
